## MODELS FF & FFC CEILING AND INLINE/CABINET VENTILATORS

### FF/FFC Application

The extremely quiet FF and FFC ventilators are available from 50 to 3600 CFM, with static pressure capabilities to 1". All units have centrifugal blower wheels (except FF50) and low RPM motors on resilient mounts (except FF50 and FF80). These units are used to exhaust air from a variety of commercial and institutional applications, such as restrooms, conference rooms, offices, storage areas, restaurants, retail stores, schools, and similar buildings.... anywhere quiet, high-capacity ventilation is needed.

The forward curved centrifugal wheel with its high static pressure capability makes these ventilators suitable for either ducted or nonducted applications. They include removable blower assemblies and plug-in permanently lubricated motors for ease of servicing and cleaning.

A complete selection of accessories including speed controls, wall and roof caps, duct transitions, inline adaptors, metal grill kits and radiation dampers simplify installation.
